Graduate student at University doing research in Field, with interests spanning **subfield of field**, adjacent topic, and methods people use to study these things.

My work combines **computational approach, theoretical framework, and standard techniques** to investigate questions about systems in this domain. I am drawn to **particular aspect of field** and applying established methods to relevant problems that need solving. I work at the intersection of discipline studying X and discipline studying Y.

RESEARCH PROJECTS

Project About Thing Using Method   *Month 202X — present*
Reference: Prof. Person Supervising, University   ✉ *person@university.domain*

- ✦ Doing technique to understand aspect of problem.
- ✦ Investigating phenomenon with applications somewhere useful.
- ✦ Developing method for answering question about behavior.

Earlier Project on Related Topic   *Month 202X — Month 202X*

- ✦ Made tool for studying system type.
- ✦ Evaluated approaches for potential use.

Research Assistant, *Place Where Research Happens*   *Month 202X — Month 202X*

- ✦ Developed software in languages for purpose.
- ✦ Implemented algorithms for predicting things.

EDUCATION

M.Sc. Subject Area, *University in City*   *Month 202X — present*
Course Name │ Tool or Method │ Topic Name

- ✦ Participation in organization relevant to field.
- ✦ Classes about concepts and applications.

B.Sc. Related Field, *Earlier University*   *Month 202X — Month 202X*
Basic Course │ More Advanced Course │ The Most Advanced Course

- ✦ Top 1 university in the world, excluding a few others.
- ✦ Studies in theory, practice and everything in between.

TECHNICAL SKILLS

Software Package │ Computational Method │ Analytical Technique │ Another Software │ Simulation Tool

AWARDS & RECOGNITION

202X-Month – Competition Organized by Institution – Top Position

202X-Month – Scholarship for Being the Best in Something

202X-Month – International Competition – Medal
